

Newcomb and Company provides a range of services for virtually every component of a facility's mechanical, electrical, and automation systems.

Services include:

Critical Power Services

- » Emergency power
- » Generator service
- » Preventive maintenance

Mechanical Services

- » Building automation systems
- » Customized maintenance programs
- » Fabrication
- » HVAC
- » Industrial and process piping
- » Plumbing

Engineering, Construction, & Energy Services

- » Design-build
- » Energy management and saving services
- » Engineering and construction

Unparalleled Performance. In Nine Major Markets.

- » Biotech/Healthcare
- » Commercial
- » Education
- » Entertainment/Hospitality
- » Financial Services
- » Manufacturing/Industrial
- » Mission Critical Operations
- » Public/Government
- » Technology

Protect and Maintain Today —for Huge Savings Tomorrow.

Founded in 1954, Newcomb and Company (Newcomb) is a full-service mechanical contractor serving customers in the commercial, residential, and industrial sectors. Newcomb provides innovative, energy-efficient heating and air conditioning services (HVAC), automation and controls, industrial piping, new-construction design and installation, and maintenance and replacement services.

Preventive maintenance is integral to a high-performing facility, and the expert technicians at Newcomb are prepared to inspect and service clients' most critical systems. Investing in preventive maintenance helps clients keep their facility's systems operating at peak levels of performance—helping to extend the lifespan of valuable mechanical equipment while avoiding costly downtime. Proper preventive maintenance helps catch complications before they develop into significant problems.

Efficient HVAC Systems. Productive Staff and Facilities.

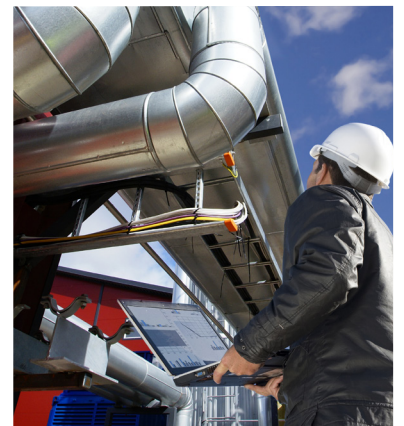

Keeping heating and cooling systems finely tuned helps ensure both the facility and its staff are working and functioning efficiently. Through a robust network of preventive maintenance professionals—from customer service representatives to field HVAC preventive maintenance technicians—clients turn to Newcomb for the proper function, maintenance, and integrity of a facility's entire HVAC system. Newcomb's vigilant inspection programs and highly capable staff help keep clients' HVAC systems functioning reliably and smoothly.

Protecting Critical Electrical Systems —while Increasing Energy Efficiency.

Newcomb can meet a facility's complete electrical service requirements while identifying energy-saving opportunities. Newcomb's preventive maintenance program and skilled team of electricians protect critical electrical systems and resolve issues that threaten crucial facility operations. By combining preventive programs with integrated electrical systems, Newcomb helps provide clients with ongoing energy-savings opportunities.

Automated Savings—through Building Automation Services.

Newcomb's building automation services (BAS) provides clients with control and energy-management solutions that can greatly increase a facility's energy efficiency. By providing commercial energy audits or integrating electrical and energy-management solutions into innovative information systems, Newcomb helps provide clients with faster, more responsive and more economical environmental management options.
